

## **Geotechnical Engineering Manager**

### **Summary**

Salt Lake County based Engineering firm is seeking a licensed Professional Geotechnical Engineer for full time employment. Oversees and manages the geotechnical engineering department to accelerate the realization of Company Mission and long-range goals. Responsible for all functions and personnel within team to coordinate the quality delivery of engineering products and services. Work focuses on preparing geotechnical recommendations for energy infrastructure and commercial/residential land development.

We are a multifaceted company, which offers employees the opportunity to participate in the various different aspects of civil engineering and land surveying. We offer a full benefits package and competitive wages.

### **Responsibilities**

Project and department management for geotechnical engineering team. Project management requires evaluating development plans to establish geotechnical investigation parameters, coordinating field investigation and laboratory analysis, and utilizing this information to prepare geotechnical reports. Reports may require various foundation designs, including deep foundations and drilled piers.

### **Qualifications**

Bachelor's degree in Civil or Geotechnical Engineering and licensed as a Professional Engineer. Experience with AutoCAD Civil 3D, Slide Software and gINT software preferred. Proficient writing and communication skills necessary. Minimum four years of geotechnical engineering experience.
